

Business Ethernet Service

Internet Speeds Up to 10 Gbps

Ethernet provides reliable business bandwidth up to 10 Gbps for a much lower cost than DS3 access or comparable Bonded T1 services. Ethernet is a fully managed solution backed by an ironclad service level agreement (SLA). If your business has intensive bandwidth demands, there's no greater value.

High-Performance Bandwidth

Ethernet delivers a choice of symmetrical speeds and is fully scalable to meet the growing demands of your business. This solution is ideal for businesses that:

- Run servers for websites, email, databases or applications
- Transfer large data, image or video files
- Use bandwidth-intensive applications
- Support remote workers or VPNs
- Require VoIP with Quality of Service

Guaranteed Reliability

Ethernet comes with the same uptime guarantee as our T1 or DS3 service. Our robust SLA guarantees 99.99% response times and installation intervals.

Asymmetrical Ethernet

For businesses that require a strong internet connection, but have less intensive upload demands, try Asymmetrical Ethernet. Speeds from 8x1 Mbps to 50x10 Mbps

Easy to Install & Manage

Ethernet uses your existing infrastructure and reliable copper loop bonding technology to ensure rapid deployment and a seamless connection. We provide a trained technician to install your service.

24/7/365 Support

Our experienced support agents are available around the clock to answer any questions that arise. We can even dispatch repair technicians after hours, on weekends and on federal holidays to keep your business operating.

Proactive Monitoring

This optional advanced service enables Fusion Connect to constantly check the status of your network to maximize availability of your service and minimize the mean time to restore connectivity, should an issue arise.

THE FUSION CONNECT ADVANTAGE

ENABLING THE CONNECTED ENTERPRISE

Optimize your business communications, costs, and continued collaboration from any place or device, with crystal-clear quality. Securely connect your business locations and remote workers.

LEADING-EDGE TECHNOLOGY

Fusion Connect's optimized platforms leverage leading technologies, meaning seamless integration of solutions across your virtual and fixed technology platforms.

DEDICATED SUPPORT TEAM
