

Fusion Connect SMS/MMS for WebEx User Guide

Overview of SMS/MMS for WebEx

- Texting allows the ability to send and receive SMS/MMS text messages to and from your User's work phone number.
- It creates an easy way for you to use a work number for business related texting instead of your personal mobile phone.
- It provides enhanced features such as editable naming of texts, creating Texting Contacts specifically for the Texting App, as well as Group Texting (allowing up to 20 participants).

Using your new WebEx SMS/MMS Texting App

- 1. Open WebEx and sign in.
- Once your Administrator provisions and enables "Texting" for your WebEx account, you will see an App named "TEXTING" located on the left of your WebEx App. Click on the Texting App. You will then be prompted to enter your assigned Fusion WebEx phone number, add it and click "Add Phone Number":

Your WebEx Texting App is now ready to send/receive texts from your Fusion Phone Number from any device capable of sending and/or receiving SMS/MMS messages!

Within your Texting App, you have (3) sections

- **Messages** where all individually sent and received texts are located.
- **Contacts** where you can save *TEXTING CONTACTS* within your App to access for texting reoccurring people on a regular basis.
- **Groups** where you can create and send Group Text Messages. *Note: You're able to add up to 19 participants to a Group Text, including yourself- you can Text up to 20 people per Group.*

Contacts section

You can add TEXTING contacts by clicking the $\stackrel{\textcircled{}}{=}$ icon once in your Contacts section. You can either **Add a new contact** manually, or **Import Contacts**:

Once you have a Contact added, while still in the Contacts section you can click on their icon to immediately send them a Text to the number saved for that contact. You can also click the "Shish kabob" icon **•••** to the right of them to edit/delete the contact:

Groups section

In the Groups section, you can create/add a Group of Texting numbers by clicking the 🙂 icon.

When adding a new Group, click the \bigcirc symbol and create a **Group Name**. You can *add Notes* for personal use. Add numbers in the **"Phone number to add"** section and **click "Add Number**":

	Text group contacts individually	
	Phone number to add (706) 421-5555 Add Number	+

***Groups created in the Groups section *by default* are set to automatically send a "Group Text" to everyone you add to your created Group, meaning everyone will see all recipient's replies and will be able to reply to everyone's reply. Also, by default if a Group is created the replies from everyone in that Group will be listed/viewable in your <u>Groups Section</u>, NOT in your <u>Messages</u> section.

*****NOTE: Creating a default Texting Group you can only add up to 19 individual mobile numbers, including your number = 20 Group participants.** This is a restriction per the FCC.

Note: When creating a Group, you have the ability to enable **"Text group contacts individually"**. This allows you to outbound Text all numbers listed in your Group at once, however recipients will ONLY reply back to you, NOT the entire Group! If *"Text group contacts individually"* is enabled your responses will be received as an individual message in your <u>Messages section</u>, NOT in your <u>Groups section</u>.

***NOTE: If you enable "<u>Text group contacts individually</u>", you can add as many participants as you want with no limitation.
