Fusion IP Faxing Pro

Turn Your PC into a Fax Machine

The Fusion Faxing service allows you to send and receive faxes from anywhere. By moving to a completely electronic faxing service, you can eliminate the costs and inconvenience of fax machines and phone lines. The service works seamlessly with traditional fax machines and services, so your customers can continue to communicate with you as they always have.

Capabilities of Fusion Fax Services

- Send & receive faxes via web portal or print driver options
- Seamless integration with all major mail client software
- Send multiple copies of faxes or documents
- Generic or custom cover pages
- Set up outgoing distribution groups for bulk mailing/faxing
- Customize settings for more efficient routing of incoming faxes
- Launch and view faxes as PDF documents or TIF image files
- Search by date, type, folder or status (outgoing/incoming, failed/success)
- Print or email notifications on send & receive (and via attachment or link)
- Organize your fax documents through filters
- Schedule faxes to be sent at a specific time and date
- Change page orientation, flip & refresh document views
- Attach multiple files (in multiple formats)
- Preview fax pages before sending
- Receive confirmation on successful transmission
- Password update, auto-login settings

Manage your faxes more efficiently with Fusion IP Faxing Service
