

VoIP Connectivity – Anywhere, Anytime.

Voice over IP (VoIP) technology has transformed the way we communicate. As the world of technology continues to evolve, the need for dependable wireless and high-speed communications has quickly increased. In our commitment to providing industry-leading solutions, Fusion has partnered with major satellite service providers to offer a businessgrade Satellite VoIP service similar to that of traditional VoIP.

Fusion’s Satellite VoIP offers an enterprise solution that utilizes state-of-the-art VoIP technology combined with the highest quality connections available.

Benefits of Fusion VoIP Satellite Service include:

- A cost-effective solution for those that have locations in isolated areas and require connectivity back to their headquarters or branch offices;
- A robust and scalable solution that promises consistent VoIP quality over a QoS managed network with the lowest latency possible;
- The ability to enjoy the benefits of VoIP, no matter where you are in the world.

Whether you have offices outside the United States, in remote locations, or on vessels such as cargo ships, aircrafts or remote terrestrial sites (i.e., oil rigs), our Satellite VoIP Service provides a reliable industry-leading solution that provides optimal coverage to allow you to connect from anywhere, anytime.
