**TARIFF FORMAT**

- A. **Page Numbering** - Page numbers appear in the upper right corner of the Page. Pages are numbered sequentially. However, occasionally, when a new Page is added between Pages already in effect, a decimal is added. For example, a new Page added between Pages 14 and 15 would be 14.1.
  
- B. **Page Revision Numbers** - Revision numbers also appear in the upper right corner of each Page. These numbers are used to determine the most current Page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc. the Commission follows in its tariff approval process, the most current Page number on file with the Commission is not always the Page in effect. Consult the Check Sheet for the Page currently in effect.
  
- C. **Paragraph Numbering Sequence** – There are nine levels of paragraph coding. Each level of code is subservient to its next higher level:
  - 2.
  - 2.1.
  - 2.1.1
  - 2.1.1.A.
  - 2.1.1.A.1.
  - 2.1.1.A.1.(a).
  - 2.1.1.A.1.(a).I.
  - 2.1.1.A.1.(a).I.(i).
  - 2.1.1.A.1.(a).I.(i).(1).
  
- D. **Check Sheet** - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the Pages contained in the tariff with a cross-reference to the current revision number. When new Pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this Page if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some Pages). The tariff user should refer to the latest Check Sheet to find if a particular Page is the most current on file with the Commission.

**2.6. PROVISION AND MAINTENANCE OF SERVICE**

- 2.6.1. Company will use reasonable efforts to make Service available to Customers on or before a particular date, subject to the provisions and compliance by the Customer within the provisions of this Tariff. The lack of facilities or other operational impediments, including regulatory approvals, may preclude or delay provision of Service (a) in a particular location or to a particular Customer and/or (b) at any promised performance level. Actual transmission speeds and service characteristics of a Service may vary from those expected by the Customer due to such factors as the length and gauge of the line and other operational characteristics of the equipment and facilities used.
- 2.6.2. At the request of the Customer, installation or maintenance may be performed outside of Company's regular business hours or in hazardous locations. In such cases, charges based on cost of the actual labor, material or other costs incurred by or charged by Company will apply. If installation or maintenance is started during regular business hours, but, at the Customer's request, extends beyond regular business hours into time periods including, but not limited to, weekends, holidays, and/or night hours, additional charges may apply.

- 2.7.2. If Service is terminated before the end of the minimum period of Service as a result of condemnation of property, damage to property requiring the Premises to be abandoned, or by the death of the Customer, the Customer is not obligated to pay for Service for the remainder of the minimum period.
- 2.7.3. If Service is transferred to a new Customer at the same Premises during the first month of Service, the new Customer assumes responsibility to meet the remainder of the minimum Service period requirements. **SECTION 2 - RULES AND REGULATIONS, Continued**

**2.20 INTRALATA PRESUBSCRIPTION PLAN**

- 2.20.1 IntraLATA Presubscription is a procedure whereby a Customer designates to the Company the IntraLATA Toll Provider (ITP) that the Customer wishes to be the carrier of choice for intraLATA toll call. Such calls are automatically directed to the designated carrier without the need to use carrier access codes or additional dialing to direct the calls to the designated carrier. IntraLATA presubscription does not prevent a Customer, who has presubscribed to an IntraLATA toll carrier, from using carrier access codes or additional dialing to direct calls to an alternative intraLATA toll carrier on a per call basis.
- 2.20.2 Each carrier will have one or more access codes assigned to it for various types of service. When an end user selects a carrier as its preferred intraLATA toll provider, only one access code of that carrier may be incorporated into the switching system of the Company permitting access to that carrier by the end user without dialing an access code. Should the same end user wish to use other services of the same carrier, it will be necessary for the end user to dial the necessary access code(s) to reach that carrier's other service(s).
- 2.20.3 An ITP must use Feature Group D (FGD) Switched Access Service to qualify as an intraLATA toll provider unless prior arrangements have been made with or by the Telephone Company. IntraLATA toll providers must submit an Access Service Request (ASR) prior to the intraLATA toll presubscription conversation date or prior to the date on which the carrier proposes to begin participating intraLATA toll presubscription, unless prior arrangements have been made with the Telephone Company.

**2.20 INTRALATA PRESUBSCRIPTION PLAN, Continued**

2.20.4 Selection of an intraLATA toll provider by an end user is subject to the terms and conditions following.

- A. At the option of the ITP, the nonrecurring charge of a change in intraLATA toll presubscription, as provided herein, may be billed to the ITP, instead of the end user. This may involve charges resulting from end-user initial free choice PIC changes, as specified in Section 2.20.10 following.

This option for the ITP to be billed for the PIC change charge instead of the end user is not available for orders placed directly with the Company.

2.20.5. Presubscription Charge Application

- A. Existing end users may exercise an initial free presubscription choice, either by contacting the Company or by contacting the ITP directly. The initial free choice must be made within 90 days following implementation of intraLATA toll presubscription. The charge for the initial free choice change will be billed to the new ITP at the discretion of the Company. End users' choices which constitute exercising the free initial choice are:
  - 1. Designating an ITP as their primary carrier thereby requiring no access code to access that ITP's service. Other carriers are accessed by dialing 10XXX, 101XXXX, or other required codes.
  - 2. Choosing no carrier as a primary carrier thus requiring 10XXX or 101XXXX code dialing to access all ITPs. This choice can be made by directly contacting the Telephone Company.
- B. Following an existing end user's initial free selection, any subsequent selection made during the first 90 days after presubscription or any change made more than 90 days after presubscription is implemented is subject to a nonrecurring charge as set forth herein.

2.20.5. Presubscription Charge Application, Continued

C. New end users who subscribe to service after the presubscription implementation date (including an existing Customer who orders an additional line) will be asked to select a primary ITP when they place an order for Company Exchange Service. If a Customer cannot decide upon an intraLATA toll carrier at the time, the Company may extend a 30-day period following completion of the service request to make an intraLATA PIC choice without charge. In the interim, the Customer will be assigned a 'No-PIC' and will have to dial an access code to make intraLATA toll calls.

1. Initial free selections available to new end users are:

- a. Designate an ITP as their primary carrier thereby requiring no access code to access that ITP's service. Other carriers are accessed by dialing 10XXX, 101XXXX, or other required codes.
- b. Choose no carrier as a primary carrier thus requiring 10XXX or 101XXXX code dialing to access all ITP's. This choice can be made directly contacting the Telephone Company. In addition, new end users that do not select a preferred carrier will be assigned a 'No-PIC'.

Following a new end user's initial free selection any subsequent selection made following implementation of intraLATA toll presubscription is subject to a nonrecurring charge set for herein.

2.20.5. Presubscription Charge Application, Continued

- D. If an ITP elects to discontinue Feature Group D service after implementation of the intraLATA toll presubscription option, the ITP is obligated to contact, in writing, all end users who have selected the canceling ITP as their preferred intraLATA toll provider. The ITP must inform the end users that it is canceling its Feature Group D service, request that the end user select a new ITP, and state that the canceling ITP will pay the PIC change charge as provided herein. The ITP must provide written notification to the Company that this activity has taken place.

Following the ITP's discontinuance of service, the Company will bill the canceling ITP the change charge for each end user that is currently designated to the ITP at the time of discontinuance.

2.20.6. Unauthorized PIC Changes

- A. An unauthorized PIC change is a change in the presubscribed intraLATA toll provider that the end user denies authorizing. PIC disputes for end users are resolved through an investigative process.
- B. If an unauthorized change in intraLATA presubscription occurs, the ITP making the unauthorized change will be assessed a charge for unauthorized change in presubscription as provided in the Commission's or the Federal Communications Commission's regulations. In addition, the ITP will be assessed the applicable charge for returning the end user to their preferred intraLATA toll provider.

In addition, the ITP will be assessed the applicable charges for returning the end user to their preferred intraLATA toll provider as provided herein.

2.20.7 Equal Access Recovery Charge.

- A. The Equal Access Recovery Charge is a charge to recover the costs that the Company has directly incurred in connection with the implementation of intraLATA toll presubscription. The Equal Access Recovery Charge is billed to intraLATA toll providers.

2.20.8 End User Charge Discrepancy

- A. When a discrepancy is determined regarding an end user's designation of a preferred intraLATA toll carrier, the following applies depending upon the situation described:
  - 1. A signed letter of authorization takes precedence over any order other than subsequent, direct Customer contact with the Telephone Company.
  - 2. When two or more orders are received for an end user line generated by telemarketing, the date field on the mechanized record used to transmit PIC change information will be used as the PIC authorization date. The order with the latest application date/time determines Customer choice.

The ITP will also be assessed the intraLATA toll presubscription change charge as specified herein, which was previously billed to the end user.

**4.1. SERVICE DESCRIPTION, Continued**

**4.1.6. Per Call Blocking**

Per-Call Blocking is automatically available to all customers served by the Company. This blocking option allows the calling party to block the passage of their telephone number and name on out-going calls. To activate Per-Call Blocking a special code is dialed prior to placing each call.

When this blocking feature is activated by the calling party, and they place a call to a Caller ID subscriber, the subscriber’s display unit will indicate that the incoming call has been blocked. Caller ID Per-Line Blocking does not prevent the delivery of telephone numbers to 911 emergency service providers. Per Call Blocking will be offered free of charge for the first instance. A fee, as set forth below, will be assessed for all subsequent uses of Per Call Blocking.

Rate Per Call, Per Use (after first instance ) \$0.50

**SECTION 4 – SERVICE DESCRIPTIONS AND RATES**

**4.1. SERVICE DESCRIPTION, Continued**

**4.1.7. Per-Line Blocking**

The calling party may prevent the display of their telephone number and name on a permanent basis by subscribing to Per-Line Blocking. This blocking option automatically prevents the display of the calling number and name for calls placed from that line to a Caller ID subscriber, unless the feature is deactivated. If a subscriber of Per-Line Blocking chooses to deactivate blocking, the calling telephone number and name would be sent for that call only. After the call is completed, the line automatically reverts back to the Per-Line Blocking feature. The deactivation of Per-Line Blocking is completed by dialing a special code prior to placing each call.

The code to deactivate Per-Line Blocking is different than the one used to deactivate Per-Call Blocking. Caller ID Per-Line Blocking will be available to all Customers in the Company’s serving area.

The Per-Line Blocking option can only be added or removed from a Customer’s line by placing a service order with the Company. When this service is removed the line automatically converts to the Per-Line Blocking capability. Caller ID Per-Line Blocking does not prevent the delivery of telephone numbers to 911 emergency service providers.

The initial request for line blocking will be provided free of charge for Customers upon request. However, if a customer subscribes, disconnects, and then reconnects line blocking at the same address, a nonrecurring product/service charge will be charged as set forth below.

**4.1. SERVICE DESCRIPTION, Continued**

**4.1.8. 900/976 Blocking**

900/976 Blocking is provided at the Customer’s request and gives the Customer the ability to restrict calls for his/her exchange access line to 900 service access. This service is provided for use with individual residence lines, business lines and Centrex lines where facilities permit. The initial blocking of a customer’s line or lines will be provided at no charge to the customer. Subsequent blocking (after an intervening elimination of the Blocking Option at the customer’s request) will be subject to a nonrecurring charge. There is no charge for unblocking.

This option blocks access to all calls dialed as 1+900-NXX-XXX and 0+900-NXX-XXXX from the customer’s exchange access line. These blocked calls will be directed to a central office announcement. Attempts to place a 900 call using a NBS operator will continue to be denied.

This option does not prevent customers from placing 900 calls from their exchange access line using Operator Service Providers other than NBS. In addition, this option does not prevent customers from placing operator-assisted or credit card calls to 900 services from a line which is not blocked.
