### Wired IP Phone Headset with Internal Amplifier—GN Netcom GN 2120 NCD 01

The GN 2120 is the state-of-the-art, professional headset for today's enterprise, delivering unsurpassed sound quality and crystal clear conversation. The headset's lightweight, sleek styling evokes a professional image and comfort is ensured by the ergonomic design. The GN 2120's several interchangeable options means you can change styles as often as you wish and the different boom arms come equipped with different microphones to suit all office environments, from quiet to louder ones.

### Wired IP Phone Headset with Internal Amplifier—GN Netcom GN 2125 NCD 01

The excellent sound quality surpasses anything you might have experienced before in the way of a headset. For noisy environments, GN 2120 Flex headsets feature the DuraFlex-II flexible boom, for exact microphone positioning, and a noise-canceling microphone, to filter out ambient noise. The GN 2125 NC is a binaural version of the GN 2120 NC. Its second leatherette-cushioned speaker and noise-canceling microphone make it ideal for noisy environments. It features a single-wire binaural design.

### Wireless Headset—Plantronics CS55

Superior digital sound meets office mobility with the CS55 wireless headset. The CS55 delivers wireless mobility up to 300 feet, superior quality with voice-dedicated 1.9GHz DECT technology to provide uncompromised audio quality. The CS55 also features 10 hours of unencumbered talk time and the option of remote answering, so users never miss calls when away from their workstation. An extended boom and noisecanceling microphone filter out background noise for crystal-clear conversation. For comfort, the CS55 can be converted to over-the ear, over-the-head or behind-the head styles.

### Wireless Headset—Jabra GN 9125

The Jabra GN9125 SoundTube microphone design delivers a lower cost alternative for quieter contact center or office environments. Automatic radio power management on base and headset yields lower power consumption, improved audio performance and enhanced battery talktime of up to 12 hours. The CS55 delivers wireless mobility up to 300 feet, superior quality with voice-dedicated 1.9GHz DECT technology to provide uncompromised audio quality. The unique four-way conference call feature lets users hold fully mobile, secure conference calls without being restricted to meeting rooms and without speakerphone distortion.

### Wireless Headset—Jabra GN T5330

Move freely around your working environment and increase productivity with hands-free communication. Bluetooth® compatible and with a full 33 foot wireless range, the T5330 unties you from the restrictions of the phone cord, allowing you to move freely around the office while taking and making calls. Additionally, it keeps both your hands free to support your unique working experience. Ergonomically designed for all-day comfort, the T5330 is an advanced cordless headset that helps you increase your productivity and optimize your business success.

### USB Web Camera—Logitech QuickCam® Communicate STX

QuickCam® Communicate STX makes video communications easy. Clearer video with 640 x 480 VGA quality and RightLight™ technology provides improved image clarity—even in low light, and your calls are always echo-free with the integrated microphone and RightSound™ technology. The QuickCam Communicate STX interoperates with C4 IP using a desktop PC and USB port.

### Deluxe USB Web Camera—Logitech QuickCam® for Notebooks Pro

The QuickCam® for Notebooks Pro offers true 1.3 Megapixel images, superior quality video, echo-free audio and is about the size of a standard house key. The QuickCam for Notebooks Pro attaches to a notebook computer via the USB port and includes a crush-resistant case for easy portability and storage. RightLight™ technology provides improved image clarity—even in low light, and your calls are always echo-free with the integrated microphone and RightSound™ technology. This Web Camera also includes a non-USB headset for PC telephony integration.
