1. DEFINITIONS AND ABBREVIATIONS

The following terms, whether or not capitalized in this Price Guide, shall have the meanings set forth below:

900 Call Restriction – Allows customers to restrict 900 prefix outgoing calls from being placed over their exchange access lines.

Repeat Dialing – Enables the customer to automatically redial the last outgoing telephone number. When the telephone number is busy, the Company's equipment will keep trying to call the number being redialed for a maximum of 30 minutes.

Business – When used in relation to service, means service provided in offices, stores, factories and all other places for business use.

Call Screening – Enables the customer to block calls from preselected telephone numbers and/or the last incoming call (without knowing the number). To block specified telephone numbers, the customer builds a screening list. To block an unknown number after receiving a call, the customer enters a code to add the number to their screening list. If facilities are unavailable to provide incoming call screening via the customer's list, standard call completion will occur. Customers whose telephone numbers are blocked are directed to a Company recorded announcement.

Call Forwarding – Automatically routes incoming calls to a designated answering point selected by the subscriber, regardless of whether the user's station is idle or busy. The subscriber may change the designated answering point using the telephone key pad.

Call Forwarding-Busy Line – Automatically routes incoming calls to a pre-designated answering point when the called line is busy.

Call Forwarding-Busy Line/Alternate Answer – Allows incoming calls that encounter a busy condition or are not answered after a predetermined number of rings to be automatically forwarded to a predesignated telephone number within the exchange or the Long Distance Telecommunications Network. The Call Forwarding customer is responsible for the payment of charges (e. g., tolls charges) for each call between the Call Forwarding equipped telephone line and the line to which the call is being forwarded.

Call Forwarding-Alternate Answer – Automatically routes incoming calls to a pre-designated answering point when the called line is not answered after a preset number of rings.

Automatic Callback – Enables a Customer to automatically redial the telephone number of the last incoming call. If that telephone number is busy, the Company's equipment will keep trying to call the number being redialed for a maximum of 30 minutes.

The results of the trace will not be provided to the Customer directly. For further action to be taken, the Customer can contact the Company via the telephone number provided in the Call Trace announcement. At its sole option, the Company will set up a tracing arrangement at no charge to the customer when in the judgment of the Company, the unwanted call(s) present a serious threat of bodily harm or destruction of property and Call Trace is not available or is not otherwise a suitable solution. In such situations, the Telephone Company, not the customer, will perform the entire call trace function.

4.5.7 Virtual Office Services

Virtual Office Service is a service whereby calls placed to a business customer's telephone number (the Virtual Office number) in one exchange are automatically forwarded to a telephone number (the terminating number) in another exchange. The Virtual Office number does not involve telephone equipment, a physical location, or manual input to initiate the forwarding of calls to the terminating number. When a Virtual Office number is called, it is intercepted at the local central office and automatically routed to whatever terminating number the customer designates. The forwarded calls can be local or toll, depending on the type of service to which the customer subscribes. The Virtual Office customer is responsible for any local usage or toll charges incurred between the customer's Virtual Office number and the terminating number. The Virtual Office number includes one path, which allows for one call to be forwarded at a time. Additional paths can be ordered to allow additional calls to be forwarded simultaneously. Virtual Office Service is available to Fusion business customers only.

Virtual Office Service is available in the following packages:

- Local Virtual Office Service
- Long Distance Virtual Office Service

A. Local Virtual Office Service

- The Virtual Office number and the terminating number are within the same local calling area.
