

Advanced Endpoint Security

Device Level Protection with Microsoft Defender

Identify & Block Security Threats

Extend your protection to all the devices, personal computers and cell phones, on your network. Microsoft Defender for Endpoint is designed to prevent, detect, investigate, and respond to advanced network threats. Your first line of defense against malware and ransomware can reduce the business risks and costs associated with a security breach.

Fusion Connect is a Microsoft Cloud Service Provider (CSP) who can provide all of your Microsoft licensing – including MS Defender – with other security, communications, and collaboration services. Consolidate your billing and support needs for simpler operations and management

What Is Advanced Endpoint Security?

Fusion Connect utilizes industry-leading Endpoint Detection and Response (EDR) technologies to provide end-users with protection against malicious content at the device level. EDR is a software-based solution that gathers and analyzes threat-related information from computer workstations and other endpoints, with the goal of identifying and blocking security incidents before they result in breaches. Advanced endpoint security measures enable a rapid response to identified or potential threats.

The recent movement from in-office employees

to remote workers or a hybrid employee-base requires augmentation of legacy perimeter security solutions with device-level protection. More devices are accessing your corporate network from remote locations over the internet. Any organization that has users with an internet connection and access to corporate resources needs endpoint security. It prevents viruses, worms and malware from compromising users by automatically detecting and blocking malicious content before it impacts the devices, and spreads within your organization.

Threat and Vulnerability Management

A risk-based approach to mature your vulnerability management program.

Attack Surface Reduction

Eliminate risks by reducing the surface area of attack.

Next-Gen Protection

Block and tackle sophisticated threats and malware.

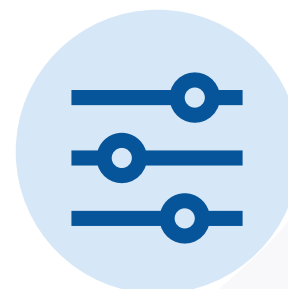

Endpoint Protection & Response

Detect and investigate advanced, persistent attacks.

Auto Investigation & Remediation

Automatically investigates alerts and remediates complex threats in minutes.

Centralized Configuration & Administration

Visibility and integration to elevate security teams and streamline workflows.

THE FUSION CONNECT ADVANTAGE

ENABLING THE CONNECTED ENTERPRISE

Optimize your business communications, costs, and continued collaboration from any place or device, with crystal-clear quality. Securely connect your business locations and remote workers.

LEADING-EDGE TECHNOLOGY

Fusion Connect's optimized platforms leverage leading technologies, meaning seamless integration of solutions across your virtual and fixed technology platforms.

DEDICATED SUPPORT TEAM

Our 100% U.S.-based expert tech support is available 24/7 to keep your business online and available regardless of the situation.
