INTERNET SERVICES COMPARISON

Fiber Access

Speeds from 5 Mbps to 100 Gbps

BEST FOR
Businesses needing fastest speeds and bandwidth, to reliably support mission-critical applications.

- Voice and video applications
- Running mission-critical applications
- Server/application hosting
- Large locations

ADVANTAGES

✓ Highest speeds for demanding usage

✓ Dedicated bandwidth

Broadband Business Fiber

Speeds up to 5 Gbps

BEST FOR
Businesses in major metro areas, that desire fiber to the customer location, providing a high-quality solution at an affordable price.

- Can tolerate best-effort service availability
- Locations that do not run mission critical apps
- Branch offices accessing applications from HQ
- Remote locations that do not upload much content

ADVANTAGES

✓ Nationwide availability

✓ Lower cost

Broadband Business Cable

Speeds up to 1 Gbps

BEST FOR
Businesses needing affordable broadband with faster download than upload speeds.

- Organizations without servers on the premises
- Locations that do not run mission-critical apps
- Remote locations that do not upload much content
- Can tolerate best-effort service availability

ADVANTAGES

✓ Nationwide availability

✓ Dedicated Bandwidth

✓ Supports Quality of Service

Wireless Broadband

Speeds from 5 Mbps to 100 Mbps

BEST FOR
Businesses needing affordable service to support temporary or remote workers, or as a failover solution.

- Connecting remote workers
- Remote locations where most internet services are unavailable
- New locations when temporary access is needed
- A fully redundant backup solution

ADVANTAGES

✓ Nationwide availability

✓ Wireless Broadband

✓ Fixed Wireless

✓ Satellite
