

# Managed WiFi

Deliver secure WiFi, for employees and guests, without the hassle. Fusion Connect provider a complete robust and secure end-to-end WiFi solution.

## Support the Influx of Wireless Devices

Connecting the growing number of wireless devices can be a challenge. With Fusion Connect Managed WiFi, you can expand your network to support the inscreasing number of customer and employees wireless devices, affordably.

Your business benefits, with:

- **Brand Support.** Customize the WiFi welcome page, and offer Facebook “Check-In” to promote your brand
- **Analytics/Customer Data.** Gather important usage and presence data to target your offers. Gain visibility into your network users, devices, and applications
- **Freedom of Movement.** Employees can move about your business, serving customers where they are using WiFi-enabled devices
- **Lower Costs.** Eliminate capital expenditures on equipment, training, technology upgrades and dedicated resources

## Fusion Connect Managed WiFi Includes:

- **Network Design & Maintenance.** Fusion Connect’s knowledgeable Network Operations Center staff will design, then monitor, configure and troubleshoot your WiFi network to keep you up and running
- **24/7 Monitoring & Management.** Once the Access Points (APs) are installed and the connection is made, Fusion Connect manages it for you. Fusion Connect can establish usage controls that support your business needed. For example, giving real-time traffic like Voice data the high priority across the network
- **Network Updates.** Firmware and software updates happen seamlessly over the web. The latest upgrades and features are automatically delivered to your Access Points and your management dashboard
- **Reporting.** Summary reports delivered in a management dashboard provide insight into your network, to better understand traffic, clients, and application usage
- **Help Desk Support 24/7/365**
- **Lifetime warranty on access points**

## ACCESS POINTS

### Enterprise-grade, cloud managed Access Points

#### Speed

Access points feature advanced, enterprise-class 802.11ac and 802.11n technologies, and support more than 100 users each.

#### Performance

Fusion Connect wireless Access Points have high-power radios, enhanced receive sensitivity, multiple antennas, and advanced signal processings. Integrated optimization with real-time spectrum analysis enables high-performance wireless in dense, demanding environments.

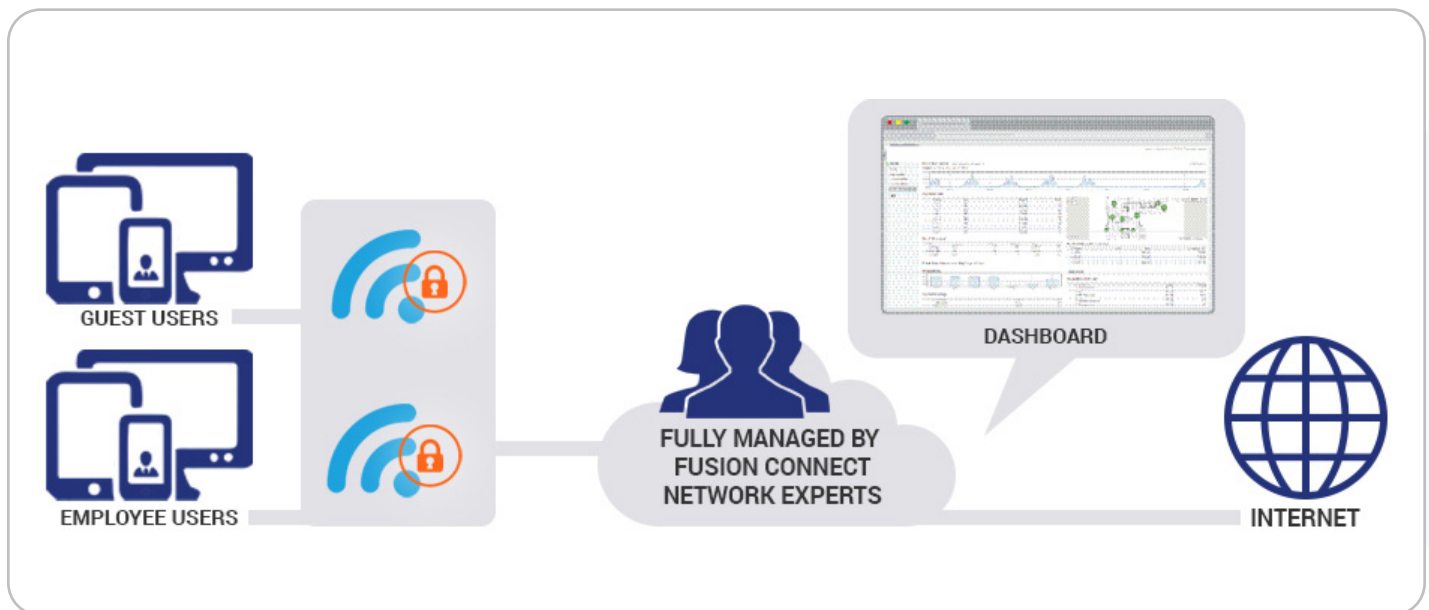

#### Security

Built-in security segments wireless users, applications, and devices, securing your network from attacks and automatically enforcing the right access policies by device or user type.

#### Versatility

Access Points support both private (secure LAN) traffic for employees, contractors, and business partners, as well as public WiFi users.
