

Save and Modernize with POTS Replacement

Worry-free Communications that Save you Money

Don't let outdated POTS lines drain your budget and complicate your network. As traditional copper lines become increasingly expensive and unreliable, organizations are saving money with modern solutions that use VoIP and cellular connections.

Migrate with Confidence

We understand your need for dependable, crystal-clear communication. Our state-of-the-art technology for POTS migration devices and implementation process deliver the reliability and cost savings you need with the confidence of ongoing monitoring.

Use Cases

Critical Systems

Legacy elevator rescue phones, security systems, and fire alarms use POTS lines to connect to emergency services.

Analog Devices

Copper lines are often used for desk phones, reception-area phones, and Point of Sale applications that require a business calling system.

Fax Machines

Fax machines are still important to many business applications. They rely on a POTS connect in order to send and receive documents.

Fusion Connect Solution

Fusion Connect POTS-in-a-box

Our all-in-one solution connects to redundant wired and wireless networks with integrated battery backup.

Hosted Voice

A full-featured, cloud-based phone service delivered over the internet to provide phone services that also can be used on PCs and mobile devices.

Fusion eFax

Do away with fax hardware altogether and move to an internet based virtual faxing—while keeping your phone.

Why Fusion Connect?

Immediate Savings

The cost of landline connections is on the rise. Fusion Connect can significantly reduce your expenses!

Regulatory Compliance

Our solutions are designed to ensure you can communicate reliably while helping you meet your compliance and NFPA 72 requirements—all while saving you money!

Backup Connectivity

It's important to have an additional connection to ensure that you are always online. Ask us about our options for additional connections, including wired, cellular, and satellite solutions.
