

Analog Phone Line (POTS) Replacement

Fusion Connect's Analog Line Replacement solutions offer cost savings with modern features that ensure your business and its critical phone services are always connected.

The telecommunications industry and federal requirements are changing, causing both price increases and decommissioning of copper technology in many areas. POTS lines may be around a long time in various forms, such as fiber-based POTS, but will be less competitive than other technologies.

Fusion Connect provides next generation voice services that are less expensive, and have more business features. To ensure always-on service for alarms and elevators, we offer a NFPA-compliant Business Voice Line with Battery Back-up.

With our service, retain the basic features you require,

- Your Existing Phone Numbers
- Your Existing Phone, Fax, and Alarm Equipment
- E911 Access

while gaining the productivity tools you want.*

- Audio Conferencing
- Visual Voicemail with Transcription
- Find Me/Follow Me
- Advanced Call Forwarding
- Voice Manager
- Simultaneous and Sequential Ring
- Speed Dial, and more

*Not all features are available with each solution.

WHY REPLACE POTS?

- ✓ Cost Savings
- ✓ Future-proof Technology
- ✓ Features for Increased Productivity & Mobility
- ✓ Call Center Functions
- ✓ Collaboration Tools for a Hybrid Workforce
- ✓ Excellent Call Quality
- ✓ Simpler IT Management
