

Remote Access VPN

SECURE ACCESS TO YOUR NETWORK, FROM ANYWHERE

Protect Your Business While Supporting Your Workforce

With the increased adoption of dispersed workforces and disaster readiness protocols, businesses need reliable and secure communications and private networks. Remote Access VPN enables your workforce to securely access mission-critical data from anywhere – regardless of your business size.

What is Remote Access VPN?

Remote Access VPN allows an individual user to connect to a private network from a remote location using an internet-connected computer. Using powerful encryption technologies, and multi-factor authentication, Fusion Connect’s Remote Access VPN provides secure remote access with extranet capabilities for authorized users.

Cloud Directory acts as your secure directory, allowing employees to connect through a VPN client using their own network sign-in credentials. Authorized users can easily gain full access to corporate resources such as email, internal applications, and data files. Your colleagues can securely access the VPN using their choice of device – smartphone, tablet, or desktop.

Secure virtual network access is a vital part of a Business Continuity strategy. Keep your business running smoothly in the case of inclement weather, temporary office closure, or as more people work from home. And even more importantly, retain access to and recover data and files in case of disaster.

Security + MFA

Strong encryption technologies - including multi-factor authentication (MFA) - means only authorized users can access your network applications and data. Ask us about 3rd-party integration with MFA.

Management & Billing

Fusion Remote Access VPN services work in conjunction with our SD-WAN and Advanced Edge Security offering for easy management. Only pay for users who logged in within a given month.

Any Device, Anywhere

With Cloud Directory you can synchronize users from multiple directories such as Workday, Active Directory, LDAP, G Suite, and others. Accessible from any device - keep your hybrid / remote workforce securely connected.

THE FUSION CONNECT ADVANTAGE

ENABLING THE CONNECTED ENTERPRISE

Optimize your business communications, costs, and continued collaboration from any place or device, with crystal-clear quality. Securely connect your business locations and remote workers.

LEADING-EDGE TECHNOLOGY

Fusion Connect's optimized platforms leverage leading technologies, meaning seamless integration of solutions across your virtual and fixed technology platforms.
