

SIP Trunking

Reduce Costs. Simplify IT Management.
Combine Voice and Internet Access
Over a Single Internet Connection

Connect your IP-enabled PBX to the public telephone system via your broadband connection

With Fusion Connect SIP Trunks, you can leverage the power of cloud-based IP phone features while you extend the value of your existing telephony investments. This saves you money and gains built-in business continuity.

Features unique to Fusion SIP Trunking - along with our broad communications and connectivity solution portfolio - make Fusion Connect a great single solution provider for all your bandwidth and modern telephony needs.

Six ways fusion connect SIP trunks stands out from alternative SIP trunk solutions

Maximum flexibility

IP-based voice solutions connect to any endpoint so you can modernize your phone system according to your needs and budget. Connect existing equipment and legacy tech (such as a Key system or on-premises PBX) for an affordable, seamless upgrade path.

Save on long distance

Combine SIP with Hosted Voice for remote employees and branch offices. It all uses one unified Fusion Connect platform, so there's no charge for interoffice calls.

Call bursting

If your call sessions temporarily spike above your subscribed capacity, we've got you covered. Get through a natural disaster or other impacting event and get back to business.

Right-sized for your needs

With our consultative approach, we help you match your business and usage demands with telephony solutions and bandwidth that fit. You won't pay for lines, services, or bandwidth you don't need, while your business performs optimally.

Business continuity

You need your phone system to work even if your PBX is down or your office has a power outage. Keep your phone system up and running with optional features that are hosted and managed in the cloud.

Multi-factor security

To help prevent fraud, Fusion Connect's SIP Trunking protects your calls by requiring both your SIP credentials and a specific IP address that you assign.

Why Choose SIP Trunks?

Save on costs

Fusion Connect customers that switch to Fusion SIP save up to 50%, reducing hardware costs and avoiding the cost of PRI trunks and analog lines, not to mention fewer long distance charges.

Simplified management

Use the same circuit for voice and data. Extend the value of existing equipment including your IP PBX. Keep more bandwidth free for data with voice compression.

Pay for what you need

Buy only the trunks you need – no need to commit to a full 23-line PRI.

Why Fusion Connect?

- F** is for Full Stack. We offer a complete set of products, all from one vendor. One contract, one number to call, one invoice. Zero finger pointing.
- U** is for USA. American made, American owned, American operated, American staffed. We're here because you prefer it that way.
- S** is for Support. We deliver a flawless experience, from Support, to On-boarding, to CX. We are long tenured, on-shore, deep experts in operations.
- I** is for Industry Leading Guarantees. We stand behind our products/services with the best guarantee in the industry, covering price, installation, and satisfaction.
- O** is for Obsessed, Customer Obsessed. In an industry where competitive products can often look the same, we are different. We make all decisions through the lens of our customer. We will do whatever it takes to do right by you.
- N** is for Network, Network Uptime. Fusion operates a fully-redundant, failover-proof network that delivers "five 9's" performance and a 100% uptime guarantee.

100% US-based support

Fully US-based support 24/7/365 ensures we are ready to respond quickly to any problem.

The most extensive service guarantees

Our guarantees are designed to provide peace of mind and ensure a world-class customer experience. We offer the industry's most comprehensive service guarantees, including Customer Satisfaction, Installation, Future-Proof Technology, Rate-lock, and 100% Uptime.
