

SIP Trunking Solutions

Reduce Costs and Simplify IT Management by Combining Voice and Internet Access Over a Single Internet Connection

SIP Trunking is the best and most common method for connecting your IP-enabled PBX to the public telephone system via your broadband connection.

With Fusion SIP, you can leverage the power of cloud-based IP phone features while you extend the value of your existing telephony investments, saving money and gaining built-in business continuity. Features unique to Fusion SIP - along with our broad solution portfolio - make Fusion Connect a great single solution provider for all your bandwidth and modern telephony needs.

Why SIP Trunking

- Fusion Connect customers that switch to Fusion SIP save up to 50%, reducing hardware costs and avoiding the cost of PRI trunks and analog lines, not to mention fewer long distance charges.
- Use the same circuit for voice and data
- Buy only the trunks you need – no need to commit to a full 23-line PRI
- Extend the value of existing equipment including your IP PBX
- Keep more bandwidth free for data with voice compression

Six Ways Fusion SIP Stands Out from Alternative SIP Solutions

Not all SIP Trunking solutions - or providers - are created equal. Discover six ways Fusion SIP goes far beyond competing SIP offerings you'll find in the market today.

- **End-point Agnostic for Maximum Flexibility**

Fusion Connect IP-based voice solutions connect to any endpoint so you can modernize your phone system according to your needs and budget. Connect your existing equipment and legacy technology such as a Key system or on-premises PBX to Fusion SIP or FusionWorks Pro Hosted VoIP for an affordable solution and seamless upgrade path.

- **Save on Long Distance with IP Telephony that Matches Your Business Needs**

Combine SIP for PBX at your main office with FusionWorks Pro Hosted Voice for remote employees and branch offices. It all uses one unified Fusion Connect platform, so there's no charge for interoffice calls.

- **Call Bursting**

If your call sessions temporarily spike above your subscribed capacity, we've got you covered. Get through a natural disaster or other impacting event and get back to business.

- **Right-sized for Your Needs**

With our consultative approach, we help you match the nature of your business and usage demands with telephony solutions and bandwidth that fit, precisely. That way you won't pay for lines, services, or bandwidth you don't need, while your business performs optimally.

- **Cloud-based Features Support Business Continuity**

You need your phone system to work even if your PBX is down or your office has a power outage. Keep your phone system up and running with optional SIP features that are hosted and managed in the cloud including Auto Attendant, Voicemail, and Call Forwarding.

- **Multi-factor Security**

To help prevent fraud, Fusion SIP protects your call initiation by requiring both your SIP credentials and a specific IP address that you assign.

THE FUSION CONNECT ADVANTAGE

ENABLING THE CONNECTED ENTERPRISE

Optimize your business communications, costs, and continued collaboration from any place or device, with crystal-clear quality. Securely connect your business locations and remote workers.

LEADING-EDGE TECHNOLOGY

Fusion Connect's optimized platforms leverage leading technologies, meaning seamless integration of solutions across your virtual and fixed technology platforms.
