

Voice for Webex

Improve Company Collaboration with Cisco Webex Services

Call, Chat, Video Conference, Screen Share, and Organize Projects. One App, Any Device.

Unified Communications as a Service (UCaaS) is an all-in-one collaboration solution delivered via the Webex or Teams app. Choose from basic softphone to premium meetings - allowing up to 1,000 participants in a single meeting! Works with nearly all popular operating systems and devices.

Never Miss A Call

Backed by a [100% uptime guarantee](#), Fusion Connect's calling system is always up and running. Even if the UC app is disrupted, you can still receive and forward calls.

Essential Tools for a Successful Remote or Hybrid Team

Web & Video Conferencing

- Improve teamwork by bringing together individuals and teams for scheduled and impromptu meetings
- One-click entry into the conference session, from chat, audio, or video conferencing
- Participants without the app can join a session with a single click within their favorite browser
- Up to 1,000 participants can join
- Share your screen, even allowing guests to have sharing controls
- Call Recording allows retaining records of conversations for compliance, training, etc.

Digital Whiteboarding, Share, Store Files

- Whiteboarding allows the presenter to draw or write on the screen share. Whiteboards can be saved for future reference
- Real-time document editing with team members at the same time in the cloud
- Archive and track changes to a managed project
- Easily search for documents, meeting notes, and other files

Third Party Integration

- Integrates with many of your favorite CRMs, Microsoft Outlook, Dropbox, G Suite, Jira, Salesforce, and more

HD Video & Voice Calling

- Create important “face time” with colleagues, distributed teams, partners, and customers
- See real-time reactions during calls; help everyone stay engaged
- Use your softphone, desk phone, and/or mobile phone interchangeably for outbound and inbound calling using your business line and company minutes plan

Presence & Instant Messaging

- See when your contacts are available - manually set personalized status. Integrate presence with MS Outlook
- Conduct one-on-one or group IM chats
- Easily search for co-workers and contacts for fast Instant Messaging or Calling
- SMS/MMS Messaging: Engage customers via text and multimedia with fully compliant, 10DLC registered business messaging

Secure Encryption

- Secured collaboration with end-to-end encryption of messages, room names, and files
- Media encryption protects audio, video, and screen sharing during the call
- Indicators for external participants so employees can make informed decisions about the content they share
- DNC & TCPA compliance capabilities ensures that your customer communication is compliant ready

THE FUSION CONNECT ADVANTAGE

CONNECT

Connecting anytime, anywhere, from any device is imperative for your business to operate at peak efficiency. To enable this, we deliver a comprehensive set of communication tools all powered by our nationwide IP backbone.

PROTECT

Security that creates too much friction slows you down, so Fusion Connect developed a frictionless, zero-trust security approach, that protects end-users and infrastructure, including end-devices, data center, and cloud resources.

ACCELERATE YOUR BUSINESS

Speed matters in business. To enable you to move dynamically, we deliver a technology stack designed to provide real-time visibility into your business performance, backed by the industry's most comprehensive service guarantee.
